

DART Bike Racks - Loading

It takes just a few moments to load or unload your bike.
It's a three step process. Follow the directions labeled on the bike rack.

Step One...Squeeze handle up to release the hatch. Lower the bike rack.

Step Two...Lift bike onto the rack, fitting the tires into the labeled wheel slots. Use the slot closest to the bus first. There is room for two bikes on the rack.

Step Three...Pull the support arm up and out and place it over the front bike tire. This arm locks the bike in place.

DART Bike Racks - Unloading

Let the driver know you will be unloading your bike before you get off the bus.

Step One... Pull support arm toward you and down over the tire to release.

Step Two... Lift bike off the rack.

Step Three... If your bike was the last bike on the rack, squeeze the handle toward you and fold the rack back up against the bus.

It's so easy!

The City of Saskatoon encourages all riders to wear a helmet when riding their bike.
